

DF-41 Simulator

User Manual

E – enter/exit the DF-41 vehicle (must be near cabin doors to enter)

R – Raise the missile tube to vertical 90-degree position (must already be “inside” the DF-41 having first entered it, and DF-41 must be at complete stop)

T – Start countdown to launch nuclear missile (the DF-41 must already have its missile tube fully raised vertically first)

When presented with the authentication device, type **HUAWEI** as the passcode and hit **ENTER**, then you will see a HUD message with a countdown to “Time to Launch” from 17 seconds to zero...

U – Cycle through showing cross section cut-through of the DF-41 missile payload... (Pressing "U" three times reverts it back to original state.)

J – Ejects / Jettisons the missile dome cap.

Q – toggles headlights on/off

2 – selects internal view/cam

3 – selects rear view/cam

Press “E” to interact with lift button and go down to the underground bunker and command center.

In the next update on July 18th 2020:

1. Helicopter will be flyable
2. Tank will be drive-able
3. Much improved nuclear launch VFX/SFX effects over the now basic/simplistic effects...
